

Installation rack double
incl. accessories, mounting bracket

Installation rack single

Installation rack WG-TEC 3000 - the future oriented installation rack with special benefits

The advantages of the WG-TEC 3000 installation racks and of the mounting thread

- Minimum time for installation
- The best thermal conductivity guaranteed, acc. to DIN 52612
- Alternative: all racks available with DVGW approved valves
- Unique: expandable polystyrol with flame retardants, acc. to the fire protection class B1
- Tile installation without previous surface treatment
- Space-saving type with compact installation size
- Minimal storage: the "double" type can be divided into the "single" type

Installation thread
the cost effective alternative

The WG-TEC installation racks contain the following parts:

- 1 or 2 pcs. concealed valves 3/4" incl. protection cap
- 1 or 2 pcs. in-wall housings 3/4" incl. protection cap
- 4 mounting brackets and screws
- Coating out of expandable polystyrol

The WG-TEC installation thread contains the following parts:

- 1 pc. concealed valve 3/4" incl. protection cap
- 1 pc. in-wall housing 3/4" incl. protection cap

All installation racks and installation threads are ready to connect and tested for leakage with 20 bar.

Mounting accessories

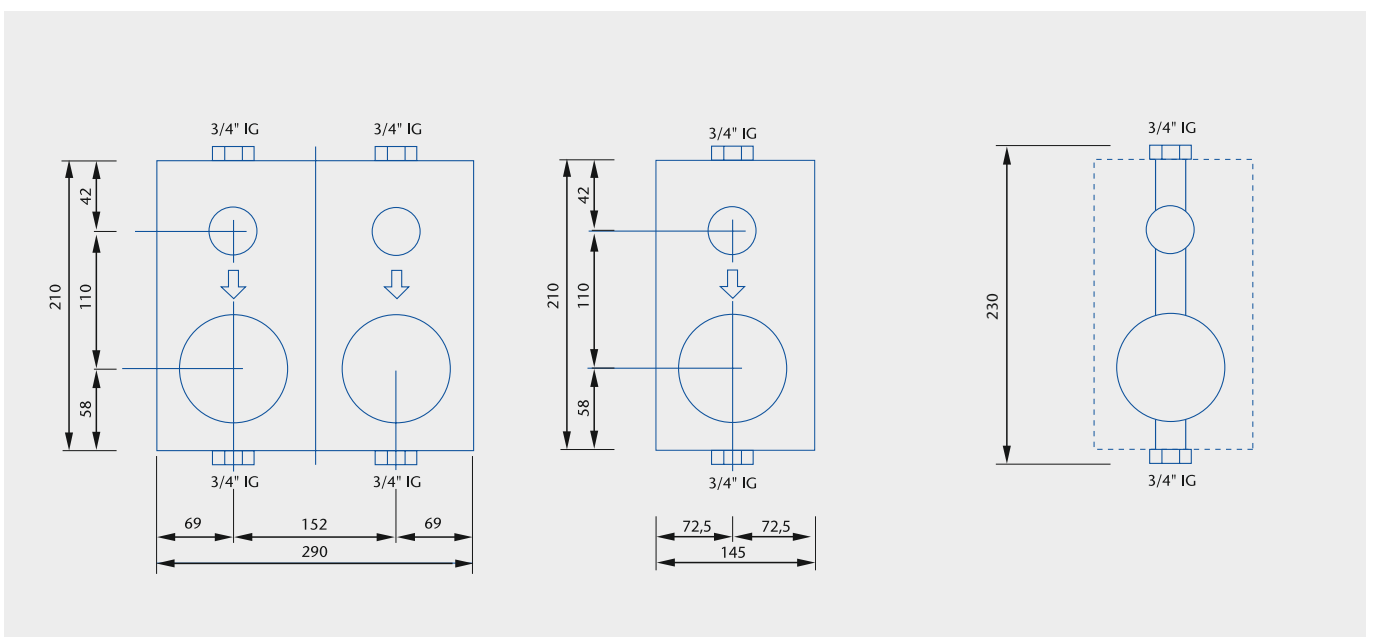

Example of mounting incl. mounting brackets

Separation of the installation rack (into a single rack) with a common handsaw

Technical data

**Our installation racks are not product related.
It's your own decision what inserts you want to choose.**
